## IOS ENGINEER

An enthusiastic and dedicated software engineer with over 4 years of experience in the mobile application field. Extremely organized with the ability to work both independently of own initiative or as part of a successful team, demonstrating the motivation and multi-tasking abilities required to meet demanding deadlines while maintaining the highest of standards. Currently looking for a new and challenging position as IOS application developer where I can showcase my experience on foreign industry.

## WORK EXPERIENCE

**IOS Engineer**                      **SOFIT Consultancy (Private) Limited, Rawalpindi, Pakistan**                      **Jul, 2021 – Present**

SCPL is a global Digital Services Provider impacting millions through its technical capabilities.

Currently working on some client's projects. My main responsibilities are as follows:

- Write, modify, integrate and test IOS (swift).
- Fluent experience with SwiftUI using clean architecture.
- Write Unit and UI Test Cases.
- Identify and communicate technical problems, processes and solutions.

**IOS Developer**                      **Translation Empire, Rawalpindi, Pakistan**                      **Mar, 2020 – May 2021**

Translation Empire providing a high-quality interpreting and translation services for all over UK.

Worked on company's core applications where a customer/interpreter/professional place bookings for interpretation and translation. My main responsibilities are as follows:

- Write, modify, integrate and test IOS (swift).
- Identify and communicate technical problems, processes and solutions.
- Assist in the collection and documentation of user's requirements.
- Maintain existing applications by making modifications as required.
- Publishing applications on App Store.

Further, I have converted the old LENET Android and IOS application to a whole new look with new features.

**Mobile Application Developer**                      **Alberuni Tech, Islamabad, Pakistan**                      **Jun, 2018 – Nov, 2019**

Alberuni Tech providing IT services to national and international customers.

Worked with different teams (UI/UX Team, API, Marketing, End Users) to move the product on correct direction. Worked on both android and iOS platforms. My main responsibilities are as follows:

- Assist in the collection and documentation of user's requirements.
- Making Paper Prototypes/Wireframes or Mock-ups on Low fidelity Software (Balsamiq)
- Development (Coding + UI)
- Testing & Bugs Fixing
- Deployment on Store (App Store or Play store)

Further, I made company to win a project of World Bank Group worth approx. 40,000 CAD.
